D2.1 Inventory of existing relevant partner networks

Title: Inventory of existing relevant partner networks

Document ID: FLEAT_WP_inventory

Deliverable 2.1 (Contractual Deadline 31/01/2008)

Date: April 2008

Author: Suzan Reitsma (SenterNovem)

Status D (Draft), F (Final), RD (Revised Draft): F

Dissemination level PU (public), RE (restricted), CO (confidential): PU

The sole responsibility for the content of this publication lies with the authors. It does not necessarily reflect the opinion of the European Communities. The European Commission is not responsible for any use that may be made of the information contained therein.

1 OBJECTIVE & CONTEXT

All the PMC members have considerable networks at their disposal. Most of them also conclude fleet owners and lease companies. Some of the partners have also international networks at their disposal.

These networks have been investigated for their complementarities and gaps in relation to the FLEAT objectives. The results of this inventory will be used as input for the networking strategy to be developed in task 2.2.

2 PROCEDURE

A format has been made to facilitate the inventory of the existing networks. This format has been sent to all the PMC members. Their input has been collected and analysed.

3 RESULTS

In table 4.1 an overview is given of the number of contacts per PMC member per type of fleet and for policy makers.

	Lease	Utility vehicles	Public transport	Public fleets	Policy makers
VITO	9	8	2	4	4
AEA	2	1	2	1	1
TRT	1	4	3	-	2
IPA SA	8	512	44	-	6
Geonardo	2	-	1	1	2
BAUM	*	*	-	*	-
SenterNovem	9	1	1	1	2
CRES	4	-	1	3	2

Table 4.2 International contacts

In table 4.3 an overview is given of the existing networks.

	Networks	Type of organisation in networks	Type of contact
VITO	Platform Eco-Driving and Fleet management	Branch organisations, policy makers, ngo's, companies with lease fleets	In person, e-mail, meetings
AEA	Austrian Ecodriving network	Branch organisations, car manufacturers, companies with lease fleets	In person, e-mail, working together in projects
	Ecodriven project partners	Energy agencies, bus fleet	In person
TRT	Ricerche Trasporti	Transport operators, research centres, public bodies	Newsletter
IPA SA	-		
Geonardo	Bio fuel Marketplace Network	Umbrella project	In person, newsletter, working together in projects
BAUM	Members of the B.A.U.M. e.V.	Different German companies with own or lease fleets – from SME to large companies	The B.A.U.M. e.V. and the B.A.U.M. Consult GmbH are both partners of the B.A. U.M. network for a long time. They are working together in projects.
SenterNovem	Dutch Ecodriving network	Branch organisations, consumer organisations, lease companies, car manufacturers, companies with lease fleets	In person, newsletter, working together in projects
	European Ecodriven	Branch organisations	In person

	network		
CRES	-		
M21	Network built up by distribution of brochures on mobility management (1200 pieces distributed)		Brochure
	Network built up through the development of the tool "Mobitest" (10 companies involved)		Working together in project
BEMAG	-		
RFOL	Örebro county sustainable transport network	Municipalities, public transport company, public organisations	In person, working together in projects
	Stockholm-Mälardalen Region infrastructure and public transport planning	Regional authorities, national road and railway administration	In person
	Association of Swedish Regional Energy Agencies	Regional energy agencies	In person

Table 4.3 Existing networks

Detailed results of the inventory have been enclosed in Annex I – III.

4 CONCLUSIONS

- The consortium has in total 744 contacts which are relevant for the FLEAT project;
- The consortium has access to several relevant existing networks, this makes networking more efficient and effective;
- The number and type of contact varies between the partners;
- The foreseen number of pilots (31) seems to be realistic with the number of existing contacts;
- The number of contacts varies for the types of fleets. Some partners with foreseen pilots in these categories have few contacts in that field. The partners will ensure, either by making new contacts or by intensifying the few current contacts, that all necessary types of fleets are available for the pilots. Otherwise the spread of the types of fleets can become a problem.
